

Qualifying exam Real Analysis August 2020

The test will be open book, with *book* specifically referring to *Bass, Real analysis for graduate students* and my own lecture notes on distributions. These are available here:

<http://bass.math.uconn.edu/real.html>

<https://math.ou.edu/~cremling/teaching/ln.html>

Please bring these to the test, if desired in electronic form on a laptop.

The test will be on Chapters 1–16 and 23, but with Section 15.4 skipped, from Bass’s book and the material from my notes.
